

CAN YOU GET OFF STARKILLER BASE BEFORE IT'S TOO LATE?

NEW FROM HASBRO AND LUCASFILM

STAR WARS: THE FORCE AWAKENS

"ESCAPE FROM STARKILLER BASE"

Pick your side? Are you a power-hungry soldier of the *First Order*? Or, are you a freedom fighter for the *Resistance*?

Thirty years after the *Rebellion* threw off the yoke of oppression from the *Galactic Empire*, the First Order that rose in its place has decimated the democratically-elected *New Republic* with a horrifying weapon: *Starkiller Base*.

A hundred times the size of the Empire's original *Death Star*, Starkiller Base not only can destroy a whole planet but an entire star system from halfway across the galaxy!

However, there is a flaw with this deadly weapon, and the Resistance led by *General Leia Organa* has sent a squadron of her best pilots—commanded by the fearless *Poe Dameron*—to exploit this flaw. However, Poe's squadron needs a crack team on the ground of Starkiller Base to bring down the planet's defense shield before the Resistance's X-Wing fighters can attack.

You're either a member of that elite Resistance infiltration unit, or part of the First Order sworn to defend the base at all costs. Unfortunately, now you find yourself trapped on a doomed world!

The base's destruction is imminent, as the Resistance has managed to destroy its thermal oscillator—the only thing that keeps the massive amount of solar blast energy for the star system-killing weapon under control.

You and two of your team have to find a way to get off Starkiller Base before it explodes into the cosmos!

And the clock is ticking!
